

The role: Developer

Who's the right person for the job?

As a Freestyle Developer, you will have commercial experience of implementing web based content management, data collection and business intelligence solutions upon Microsoft technologies. You will have working knowledge of Microsoft centric enterprise level infrastructure, middleware technologies, databases and application servers. You will be able to display previous commercial examples of successfully delivered web applications, based upon the Microsoft .NET framework. You will be passionate about the technology which you deliver, and will constantly strive to improve both the teams' and your own work, to ensure a truly valuable experience for our clients.

Our client-base is both broad yet challenging: whether we are working for one of the world's leading car manufacturers, or our 2012 Olympic hopefuls, we work tirelessly to bring innovation to our clients, often working at the forefront of the market.

You should be able to offer the following:

Required Skills:

- Minimum 3 years commercial knowledge of delivery web applications using ASP.net 4, 3.5 & 2 within C#
- Strong understanding of general web development technologies and methods
- Strong understanding of web application hosting infrastructure, including best-practice networking, caching & reverse-proxying techniques
- Knowledge of working with enterprise-level architecture (e.g. WCF communication, Windows Services, Message Queuing etc)
- Working knowledge of ASP.net (C# & VB.net), ASP (VBScript), HTML, JavaScript/JQuery, CSS etc
- Good knowledge of working with RDBMS technologies (specifically MSSQL, but others are preferential)
- Good knowledge of third-party integration techniques, such as CRM & social tools (Facebook, Twitter etc)
- Demonstrable development lifecycle understanding within the Agency industry
- Working experience of content management & asset management techniques or theories

Desirable Skills

- Knowledge of non-Microsoft database platforms and ETL technologies (e.g. Oracle)
- Knowledge of non-Microsoft web development technologies (e.g. PHP, JSP)
- Relevant Microsoft Certifications
- Experience or knowledge of Agile development methodologies
- Understanding of other Microsoft technologies (e.g. SharePoint, BizTalk, Dynamics)
- EPiServer, Ektron & OpenText (RedDot) content management experience

Required Competencies

- Passion for technology and innovation, and for implementing it on behalf of our clients
- Desire to take ownership & responsibility to see a challenge through to completion
- Must work well either within a team or individually
- Highly self motivated
- Excellent investigative & problem solving abilities
- Ability to apply commercial awareness to development tasks
- Eye for detail & quality
- Excellent communication skills - both verbal and written

What you get at Freestyle:

- Opportunity to be part of a truly successful company
- Competitive salary
- 5% Non-contributory pension
- Company Healthcare benefit
- Annual bonus dependent on individual and company performance
- 22 days holiday including 2 duvet days
- Time off between Christmas and New Year
- Flexible holiday option
- Sabbatical after 3 year's service
- Company events and activities
- Coffee, tea, biscuits and fruit
- As we work in a rural location, you'll be working in an environment with character and also benefit from not having to pay for parking.
- This role is only open to residents of the UK that have the valid permissions to work here
